

#### ***Joint CCMAA and CCMS event February 2014***

The association also held a successful inaugural joint alumnus-student meeting with the CCMS on 22nd February 2014, attended by 33 students, 17 alumni (with a good spread from 2006-1962) and five fellows. The programme included discussion on important public health issues, the impact of the Francis Report on the medical world and workshop sessions on the duty of candour and on developing mentoring opportunities between the alumni and student groups [Link to programme here](#). Two draft outcomes from the workshop sessions can be seen [here](#). Feedback was uniformly positive, the day being held to be very enjoyable, informative and useful by all respondents: “it was a good all round day” - “It all worked well which one cannot say about most meetings!” – “Enjoyed discussion on health/obesity & changing environments with approaches to behaviour rather than cognition – very interesting” – “Lunch was great!”
